

# ROTARY DRUM MOWER

- There are 2 drums rotating opposite to one another and 3 knives rotating by high environment speed on each drum.
- It is used to cut any feed plants, weeds, meadow, roadside heaths and herbs by the help of the knives.
- It is possible to set cutting size by adjustable cutting height.
- Drying is provided in short period of time by protecting plant nutrition values.
- Low power requirement provides savings from time and fuel oil. It performs work in high quality without tiring out the tractor.
- Its compliance to roughness is quite successful.
- Security is provided by pulley mechanism by stretching belts through a bow.

## TECHNICAL SPECIFICATIONS

MODEL	Number of drums (PIECE)	Working width (MM)	Transport width (MM)	Overall height (MM)	Number of Blades (PIECE)	Optimal Working speed	Capacity (da/h)	P.T.O. Shaft Rotations (Max.)/(Min-1)	Weighth (KG)	Power requirement (HP)
<b>RDM-A 30</b>	2	1350	1175	990	6	5-7,5	5,5-8	540	385	30
<b>RDM-A 40</b>	2	1650	1518	1075	6	5-7,5	6,5-10	540	422	40
<b>RDM-A 50</b>	2	1900	1500	1035	6	5-7,5	7,5-11,5	540	485	50
